PROFIT-TAKING MARKET. Principal Trading Was in So-Called War Stocks and Allied Shares.

New York, May 1.—In its main aspects today's short session of the stock exchange was largely a repetition of recent days, in the sense that a very considerable part of the turnover was again in so-called war stocks and allied shares. Westinghouse and others in that class constituted the most prominent features, although they failed to make new high records, and, if fact, reflected selling for profits at the end.

Studebaker was strongest of the

Studebaker was strongest of the motor group, with a new high record on rumors of dividend prospects. Standard stocks were more or less neglected throughout and for the most part fell under yesterday's lowest quotations, though showing some betterment at the close. United States Steel was the only one of the speculative favorites to show relative steadiness rising to its best in the final dealings. The market was more than an or-dinarily professional affair, much of the tradiging, which exceeded half a million shares, representing week-end settlement of outstanding contracts. The course of prices from time to time suggested a renewal of bearish oper-ations in some of the more vulnerable

General news of the day, which dealt with improved conditions in many lines of trade, particularly textiles and steel, together with latest war developments, played little, if any part in the day's operations. The bank statement was in line with expectations, showing a large actual cash gain, with an expansion of over \$3000,0000 in loans, the latter a natural reflection of the week's activity in the stock market. Total shares of stocks amounted to

508,000 shares.

The bonds market was even more irregular than the stock list, on a minimum of trading. Total sales (par value), aggregated \$2,250,000 United States coupon and registered 2s and Panama 3s declined 1-4 per cent. on call during the week.
